Hiring Manager
AMD
Markham, Ontario, Canada

Dear Hiring Manager,

I am excited to apply for the Software Engineering COOP position at AMD. As a current Software Engineering student at Thompson Rivers University with a fundamental understanding of how computers work, I am hoping to contribute to AMD's projects, specifically where I can apply software and hardware skills. My hands-on experience from taking apart and building my PC (Ryzen and Radeon), as well as childhood arduino projects has given me a passion for how software and hardware connect..

I have always been fascinated by computer graphics and have wanted to create something as complex as a 3D ray tracer. I hope my curiosity and experience aligns with AMD's mission to push the limits of next generation computing and maintain the spot of the best CPUs and GPUs. I am excited about the opportunity to collaborate across the stack from user space to kernel and hardware and to learn from industry leaders at AMD.

Thank you for considering my application. I look forward to hearing if my technical skills and passion for innovation can contribute to AMD's ongoing success.

Sincerely,

Bradley D. Schmidt
